\* Included in Hardware Kit (p/n 0541-079)

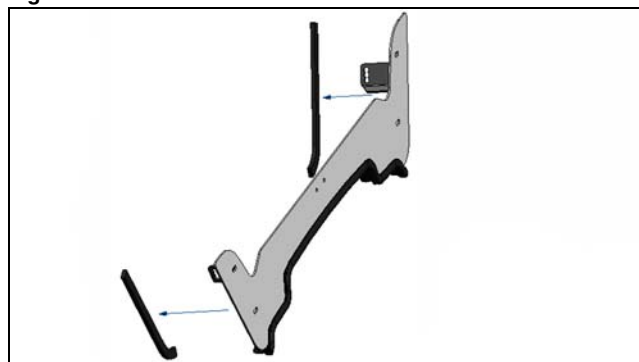

\*\* Included in Vent Assembly (p/n 0541-867)

Illustration is on page 4 of this instruction.

■ **NOTE:** If a roof is installed on the vehicle it must be removed before installing this windshield.

1. Install Lower Fixed Panel Trim onto Lower Panel Assembly; then install Lower Panel Side Trim onto the lower panel. See Fig. 1.

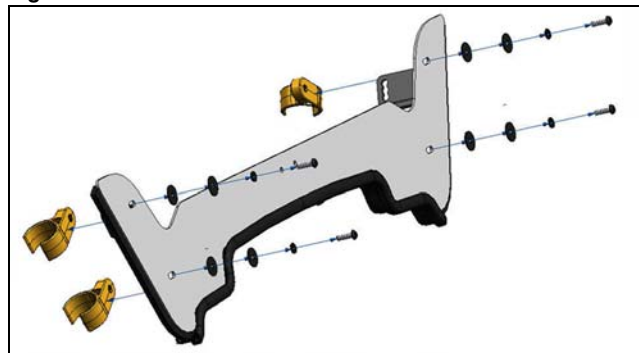

Fig. 1

ROV-217

2. Install all four Clamps to the lower panel assembly using four Button-Head Screws (M6 x 20 mm), four Black Lock Washer, four Black Fender Washers, and four Black Rubber Seal Washers. Finger tighten only at this time. See Fig. 2.

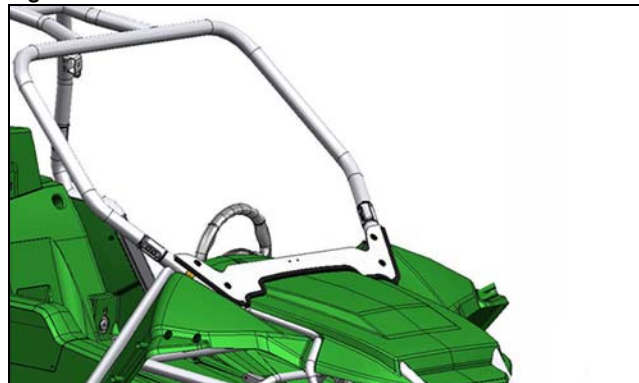

Fig. 2

ROV-219

3. Install the lower panel assembly onto the vehicle making sure the lower trim is aligned onto the hood. Tighten screws securely. See Fig. 3.

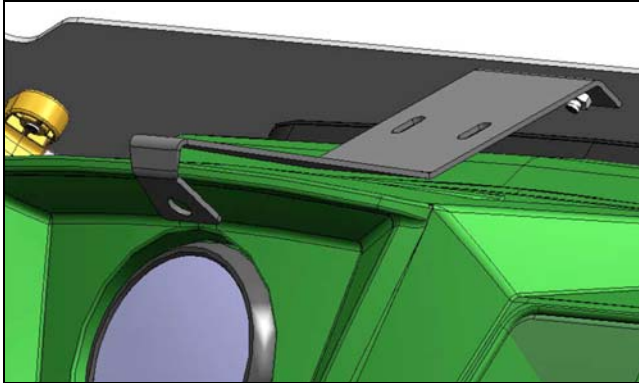

Fig. 3

ROV-220

4. Loosely install Catch Grab Bracket onto the lower panel assembly using two Button-Head Screws (M6 x 16 mm), two Black Fender Washers, and two Black Rubber Seal Washers; then mark the mounting location on the dash above the LCD gauge. See Fig. 4.

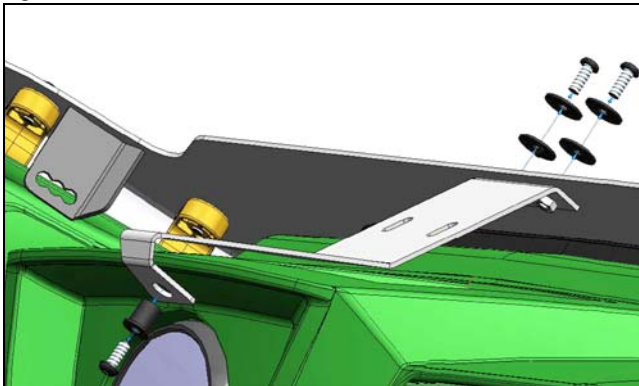

Fig. 4

ROV-221

5. Remove the bracket; then using a 13 mm drill bit, drill the mounting location; then install the bracket and secure to the lower panel assembly using the hardware from step 4.
6. Install Well Nut into the dash; then secure the bracket to the dash using one Button-Head Screw (M6 x 16 mm). Tighten all hardware securely. See Fig. 5.

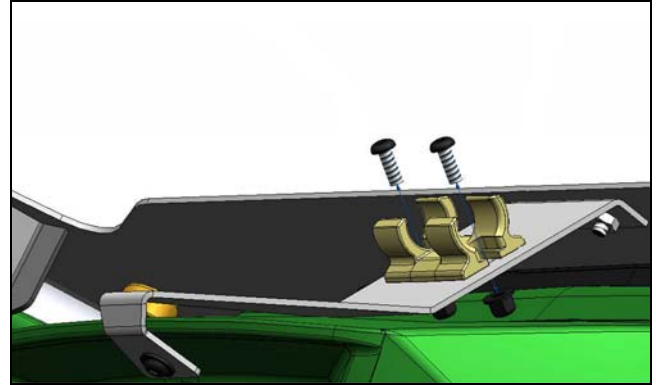

Fig. 5

ROV-222

7. Secure Grab Catch to the grab catch bracket using two button-head screws (M6 x 16 mm) and two M6 Nylon Nuts. Finger tighten only at this time. See Fig. 6.

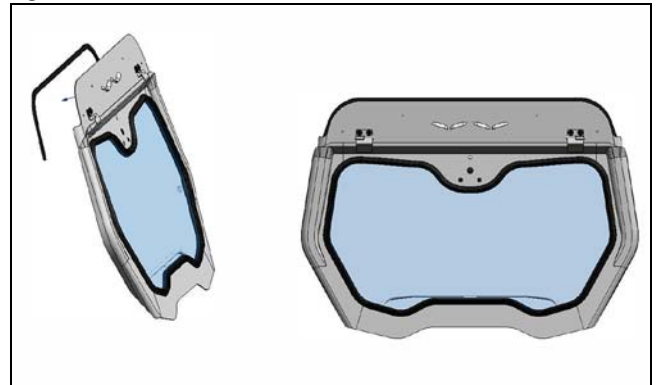

Fig. 6

ROV-223

8. Install Top Panel Trim onto the fixed Upper Panel Assembly. See Fig. 7.

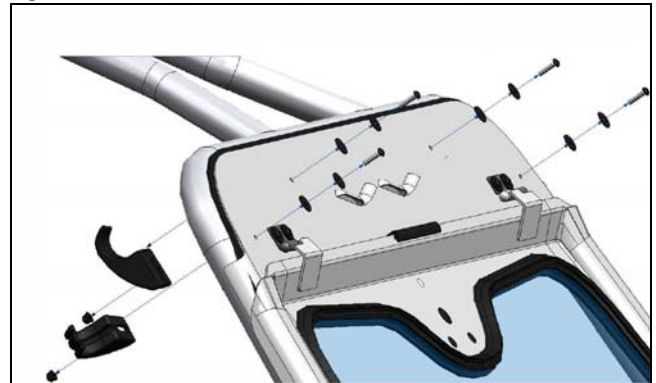

Fig. 7

ROV-224

9. Position the upper panel assembly over the front ROPS tubes and secure using four C-Clamps, four Button-Head Screws (M6 x 25 mm), four black fender washers, four black rubber seal washers, and four M6 nyloc nuts. Tighten securely. See Fig. 8.

Fig. 8

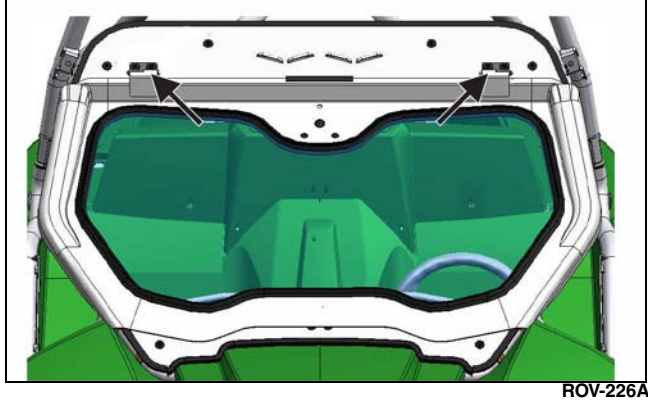

ROV-225

10. Secure Handle onto grab catch; then move grab catch along slots if adjustments are needed. Tighten the screws completely.

11. Check if the window needs any adjustments towards the left or right of the vehicle. If adjustments are needed loosen bolts and adjust. Tighten when finished. See Fig. 9.

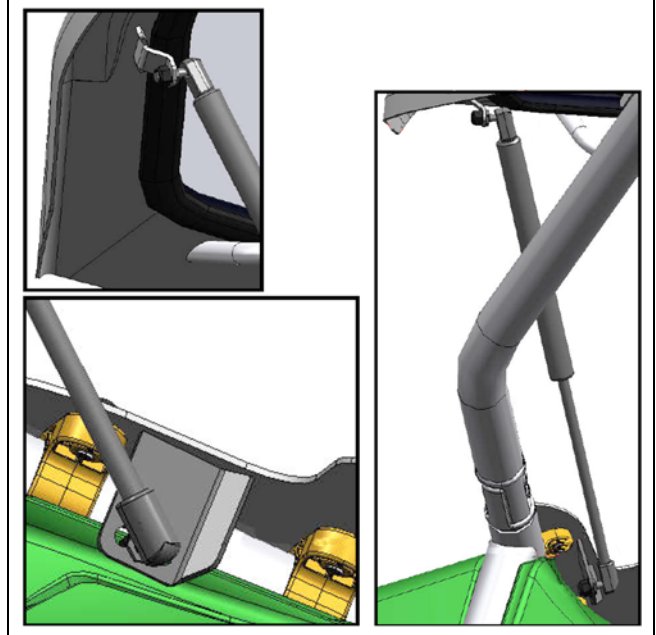

Fig. 9

ROV-226A

12. Lift up on the window assembly; then install both Gas Springs to the upper panel assembly and the lower panel assembly using four M8 Nyloc Nuts. Tighten securely. See Fig. 10.

Fig. 10

ROV-227

■ **NOTE:** The gas spring body should be installed on the top.
